

Laravel Breeze and [Laravel Jetstream](#) are official starter kits designed to provide a robust starting point for user authentication in Laravel applications.

Laravel +1

Laravel Breeze

A minimal, lightweight implementation of all Laravel's authentication features. It is ideal for developers who want a simple starting point with total control over the generated code.

Laravel +3

- **Best For:** Simple applications, beginners, and projects using traditional Blade templates or wanting a clean slate for customization.
- **Key Features:** Login, registration, password reset, email verification, and a simple profile management page.
- **Frontend Stacks:**
 - **Blade with Alpine.js** (Default)
 - **Livewire** (for reactive PHP-based UIs)
 - **Inertia (Vue or React)** (for Single Page Application experiences)
 - **API Only** (to serve headless backends like Next.js).
